Activity 2: Understanding the Test Level and Test Types

Understand the **test levels** and **test types** from given slides and videos. Discuss in your assigned team Discord. Write the answers in the assigned Jamboard.

Referring to the Load Transportation Robot case study:

i. If your team were managing the testing of the Load Transportation Robot, which **levels of testing** would your team plan? Why?
   - What would the **major goals** of each chosen level of testing be?
   - Identify possible **entry and exit criteria** for each identified level.

ii. What kind of **acceptance test**, if any, would your team plan? Why?

iii. What **testing types** that your team might plan for testing the robot? Why?
