Problem Solving (4%)

Deliverable: Week 1
Submission: Week 3

Work in your group. Please ensure that every member has watched the 2 videos and understand the testing principles and importance of testing. Apply the understanding to the Load Transportation Robot case study.

You are involved in a project to test for the Load Transportation Robot. Based on the given SRS of Load Transportation Robot, you and your team have to convince the project manager of the importance of testing the system.

i. extract and classify the quality characteristics/factors that have been written in the SRS document according to ISO 9126 quality model. You are also required to add any of the quality related requirements should your team feel that the requirements are missing and need to be tested.
ii. Discuss why testing is important in this project? The importance discussed must be applied to the system.
iii. Discuss how **TWO** testing principles must be considered and applied in the project.

Instruction

1. Watch the two videos that are provided along with this question
   > Why Testing is important
   > Seven Testing Principles

2. Solve this task in your assigned group. Appoint one leader to lead this assignment
3. Discuss using the assigned Problem Solving Jamboard for each group. The % of mark for individual will be determined by the contribution given in the jamboard by each member.

4. Submit this assessment through GC BY **Saturday (30th. Oct. 2021) by 9 am.**

5. Failure to submit this on time, will cost you a penalty mark.

Rubric

Taxonomy Level	C4			**Weight**	**Mark** (total 10)
Marking Scale	**0** **Student is not able to:**	**1-2** **Student is able to:**	**3-4** **Student is able to:**		
Q1	Identify and list key quality characteristics with **correct** detail descriptions of two quality sub-characteristics for each key that **suits** the said system/application.	Identify and list **a few** key quality characteristics with **correct** detail descriptions of two quality sub-characteristics for each key that **suits** the said system/application.	Identify and list **four** key quality characteristics with **correct** detail descriptions of two quality sub-characteristics for each key that **suits** the said system/application.	1	/ 4
Q2	demonstrates adequate understanding of the importance of software testing as well as limited ability to discuss the importance accurately for the said system/application.	demonstrates a **limited to adequate** understanding of the importance of software testing as well as limited ability to discuss the importance accurately for the said system/application.	demonstrates clear, accurate, detailed and comprehensive understanding of the importance of software testing **and** the ability to discuss the importance accurately for the said system/application.	1	/4
Q3	demonstrates adequate understanding of a relevant software testing principle	demonstrates a **limited to adequate** understanding of a relevant software testing principle	demonstrates clear, accurate, detailed and comprehensive understanding of a relevant software testing principle	0.5	/2
